## **Grounds and Facilities Standards**

### **2025**

#### **Introduction**

All clubs want to be able to play at venues with the best facilities possible. However, it is recognised that clubs are all very different and the opportunities to improve may be limited in different ways.

The league Grounds and Facilities Standards document sets out the desired and required standards for the various tiers. They are largely aspirational but do require clubs to do whatever is reasonably possible to work towards them.

In extreme cases, the league may stipulate that reasonable improvement is required and an appropriate timeframe and action plan will be agreed to work towards this.

The league is here to help, in terms of interest-free loans, direction to funding opportunities and throwing their weight behind clubs who need their help developing at venues where landowners are not supportive.

**As part of the CCL/OCA amalgamation, all clubs will be placed in their respective tiers based upon their playing standard, irrespective of their grounds and facilities standards. If a club is placed in Tier 4 for 2021, then gets relegated, they will be able to gain promotion back to Tier 4, assuming their grounds and facilities standards have not changed for the worse.**

**If however the club's facilities do not meet the requirements for Tier 3, they may be denied promotion to this level until the facilities are brought up to the minimum standard, or a comprehensive, timed and costed plan to achieve this is presented to the League Management Committee.**

This is a non-exhaustive list and will be reviewed from season to season and in the first couple of seasons the league will look at individual clubs on a case to case basis.

Any changes to this framework will be communicated well in advance, to allow clubs to manage the financing and implementation of projects over a number of years.

The standards are laid out below and are categorised as follows:
